Kaba turnstiles for 22 stadiums in Greece

Rümlang, 6 January 2009 – **Major order for Kaba: As part of a project to improve access security at the 22 most important arenas and sports stadiums in Greece, Kaba has won the order to install state-of-the-art turnstile systems.**

Kaba beat international rivals to win this major CHF 2 million project, confirming its competitiveness as a leading worldwide provider of access systems for sports stadiums. Its track record includes more than 100 completed projects, including some of the stadiums used for the 2008 Olympic Games in Beijing.

Kaba has developed access systems that are specifically tailored to sports stadiums in terms of both function and design. They also meet the highest standards of reliability, robustness and throughput while complying with all international security requirements. Technically similar solutions installed at the Karaiskaki Stadium for the 2004 Olympic Games have performed outstandingly over an extended period.

The new project is being implemented in collaboration with Kaba Gallenschütz's longstanding local partner company, which is responsible for installing the products and for integrating all the components of the ticketing system.
